Application/Control Number: 10/090,060

Art Unit: 1755

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 102(a,b, and e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nanko et al. '038 B2, Blackie et al. '505, Cook et al. '743 B1 or '576 B2, Beshay '093, or Lin et al. (abstract).

All of the above cited references teach treating or pretreating cellulose fiber prior to its addition to a cement binder thus anticipating the instantly claimed invention.

Nanko et al. '038 B2 teach chemical pretreatment of celllose fibers with cationic polymers and surfactants (see for example claims 1-2 in cols 16-17).

Application/Control Number: 10/090,060

Art Unit: 1755

Blackie et al. '505 teach treatment of cellulose with chelate compounds prior to addition to cement (see claims).

Cook '743 B1 or '576 B2 teach pretreating cellulose fibers with a polyvalent cation containing compound (ie dispersant) thus anticipating the instant invention (see claims).

Beshay '093 teach pretreating cellulose fibers with silylating agents such as organosilanes (dispersants) thus anticipating the instant invention (see claims).

Lin et al. teach soaking in silane the cellulose fibers used in cement compositions as reinforcement (see abstact) thus anticipating the instant invention.

Even if not anticipated, overlapping ranges of amounts would have been prima facie obvious to one of ordinary skill in the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Marcantoni whose telephone number is 571-272-1373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
